The Definition Dissection Download

by Donna Reish a.k.a. Language Lady

The Definition Dissection Download

"Give a man a fish and you feed him for a day; teach a man to fish and you feed him for a lifetime." This famous quote is used to describe why it is important to teach skills to people –not just give them money for what they need. It is used in missions, soup kitchens, home provisions for the poor, and many other benevolent scenarios. One scenario in which this quote greatly applies (that we often do not think of) is in teaching students. We can hand the student skills and information and help him on that day to gain that particular knowledge. Or we can help him "learn how to learn"—and he will gain knowledge for himself over and over again throughout his life. This is especially true in the areas of vocabulary building. We can give students word lists, practice pages, and vocabulary books—and they can learn the words that are contained within those pages. Or we can teach him how to dissect passages, sentences, and words for himself—and he will learn how to figure out the meanings of words forever.

That is what the Definition Dissection packet is all about! It is a vocabulary product in which the six Definition Dissection tricks are taught in detail (with steps for carrying out each one): 1. Clue Words; 2. Parts of Speech; 3. Roots and Affixes; 4. Trigger Words; 5. Context; 6. Synonyms. Each trick is taught in a full page of steps and examples followed by a full page of enumerated steps and examples. Following the dozen pages of the six tricks, the product has a page of Roots and Affixes with words listed beneath each one. Following this, there are several pages of categorized words that are similar or related to each other.

Students:

You know a lot more than you think you do! And you can use what you already know to unlock even more information.

Definition Dissection (DD) is going to help you use what you already know to learn even more.

When you read, especially if you read challenging books and materials, you probably come across words that stump you. When this happens, it is especially difficult to understand what you are reading.

However, if you use one of the six tricks given below, you will learn how to learn. You will, in essence, teach yourself many things that you do not already know--or, at the very least, remind yourself of what you do know. So, when you come across an unfamiliar or completely unknown word in your reading, try using one of the Definition Dissection tricks listed below to unlock it.

Similar Words List	page 8

Definition Dissection

You know a lot more than you think you do! And you can use what you already know to unlock even more information. Definition Dissection (DD) is going to help you use what you already know to learn even more.

When you read, especially if you read challenging books and materials, you probably come across words that stump you. When this happens, it is especially difficult to understand what you are reading. However, if you use one of the six tricks given below, you will learn how to learn. You will, in essence, teach yourself many things that you do not already know--or, at the very least, remind yourself of what you do know. So, when you come across an unfamiliar or completely unknown word in your reading, try using one of the Definition Dissection tricks listed below to unlock it.

Definition Dissection Tricks

- 1. <u>CLUE WORDS</u>--Figure out the <u>type</u> of the word in question by using clue words. Clue words are words in the rest of the sentence that might help you. You can use the context of the sentence (the meaning of the rest of the sentence) to help you tell what type of word the questionable word is. If you read the sentence containing the word, leaving out the challenging word, you can often tell if the word is a **positive** word, **negative** word, **neutral** word, or an **extremely positive** or **negative** word.
 - a. For example, in the sentence below, even if I do not know the meaning of the word *abject*, I can tell that the word I am studying is *not* a positive word--but is actually an **extremely negative** one. I can tell this because of the words *bad news* and *difficult*. These words tell me that the questionable word is going to be negative.

The <u>bad news</u> just seemed to keep pouring in; these **abject** circumstances were <u>extremely difficult</u> for Amy.

b. For example, in the sentence below, even if I did not know the meaning of the word *obtuse*, I could tell that it is a **neutral** word--and that it has something to do with something being *obvious*. I can tell this because *account pass words* that are public information (phone numbers or addresses) are too easily stolen or discovered.

Banks often tell people not to use <u>account passwords</u> that are so **obtuse**, like their <u>phone numbers</u> or addresses.

Using This DD Trick

- (1) Underline the word in question with one color of highlighter.
- (2) With another color highlighter, box "clue words"--those words that help you determine what type of word the difficult word is (like *difficult* or *password/phone numbers* in the examples given above).
- (3) Using the word or words that you boxed in step two, determine whether the questionable word is **positive**, **negative**, **neutral**, or **other**.
- (4) Now read the sentence aloud, substituting a word you know (one that "fits") for the questionable one. This word quite possibly could be a synonym (word that means the same) for the questionable word.

Examples:

The bad news just seemed to keep pouring in; these <u>abject</u> circumstances were extremely <u>difficult</u> for Amy.

Could substitute *negative*, *bad*, *horrible*, *lowly*, *base*, *dejected*, *deplorable*, *forlorn*

Banks often tell people not to use account passwords that are so obtuse, like phone numbers or addresses.

Could substitute obvious, personal, known, imperceptive, opaque, stolid

- 2. <u>PARTS OF SPEECH</u>--**Figure out what part of speech the questionable word is.** Sometimes the meaning of a word, and even the entire sentence, can be unlocked for you if you can discern the part of speech that the challenging word is. There are some definite keys to longer words that unlock the part of speech the word is often used as.
 - a. Nouns--Nouns often end in the suffixes tion, sion, ance, ence, age, ige, ia, um, ian, ade, acy, ology, onomy, tude

Examples: association, ascension, annoyance, intelligence, vestige, curricula, curriculum, thespian, tirade, theocracy, biology, taxonomy, solitude

b. Verbs--Verbs often end in the suffixes ate, er, ire, ose

Examples: remediate, alter, transpire, transpose

c. Adjectives--**Adjectives** often end in the suffixes *ful*, *ent*, *ant*, *ate* (like verbs often do), *ious*, *ous*, *ar*, *able*, *ial*, *al*, *ic*, *ible*, *ine*, *an*

Examples: beautiful, opulent, extravagant, immediate, vicious, popular, veritable, ursine, American, ulterion, trivial, transcendental, geometric, tangible, taurine

d. Adverbs--Adverbs often end in the suffix ly

Examples: extravagantly, immediately, affordably, accurately

Using This DD Trick

- (1) Underline the word in question with one color of highlighter.
- (2) Box the part of the word that can possibly tell you what part of speech it is.
- (3) Once you think you know the meaning of the word, substitute a word that is the same part of speech to see if it fits. (It doesn't have to be a synonym for the word; you're just looking for part of speech now.)
- (4) Once you know the part of speech of the questionable word, see if the context of the sentence will help you further unlock the word.
- (5) Try combining this DD trick with another one for especially challenging words.
- (6) List other words that are the same part of speech that the questionable word is--ones that could have similar meanings.

Example:

The boy was agile on the balance beam, so his routine was flawless.

Choose a synonym for agile:

- a. athlete
- b. acrobatic
- c. spry
- d. gymnast

If you had learned to determine parts of speech, you would know that *athlete* and *gymnast* are nouns, whereas *agile* is an adjective. You would not choose a noun to substitute for an adjective. (Of course, you have the DD hints in this sentence too--the trigger word *so* and the positive describer *flawless*.)

Note: This trick is especially helpful for standardized testing. For example, if you can tell that the questionable word in the sample is an adjective, you will know that you should not choose a noun for the blank.

3. ROOTS AND AFFIXES---Use your knowledge of roots, prefixes, and suffixes.

a. Root word--A root word (sometimes called a base word) is a word without an affix (prefix or suffix). In other words, it is a base word that has nothing else added to the beginning or end of it. Since we have accumulated our vocabulary from other countries and cultures, many of our words are related to each other. That is, they have similar roots that all mean the same thing. If you can look at a word's root (base) and see that you know the meaning of it (or know words that also contain that same root), you can often determine a challenging word's meaning.

For example, you probably already know the root to each of the words given below, even if you do not know the meaning of the word itself:

(1) **Pag**ina tion: Because you can see the root word *page*, you can tell that *pagination* has something to do with pages, possibly numbering pages. Because you know that *tion* words are often nouns, you can know that *pagination* is a **thing** having to do with (a process) of **numbering pages**.

pagination--Do you see part of the word page there?

(2) **Illustri** ous: Because you can see the root word *illustrate*, you can tell that *illustrious* has something to do with illustrating--or something beautiful. Because you know that *ous* words are often adjectives, you can know that *illustrious* is a **describer**, telling that something is **like an illustration**--or is beautiful.

illustrious--Do you see part of the word illustrate there?

(3) **Subordina** tion: Because you can see the root word *subordinate*, you can tell that *subordination* has something to do with *subordinate*—something lower than something else. Because you know that *tion* words are often nouns, you can know that subordination is a **noun**, something that is **lower than something else**.

subordination--Do you see part of the word subordinate there?

- b. Affixes--Affixes are letters that are attached (or "affixed") to a word. (Do you see the root affix--meaning to attach, there?)

 There are two kinds of affixes:
 - (1) Prefix--A **prefix** is a letter or letters added to the **beginning** of the root word. (The word prefix is a combination of *pre*--meaning before and *fix*--meaning attach.) A prefixe is **more important to meaning** than a suffix because it alters the **meaning** of the root word--often making it mean just the opposite. It is important for spelling that you understand that a **prefix does not change the spelling of** a root word--it is just attached to the beginning of the root word without any spelling change.
 - (a) unkind--un means not; unkind means not kind
 - (b) disheartening--dis means not; disheartening means not heartening
 - (c) nonnegotiable--non means not; nonnegotiable means not negotiable
 - (2) Suffix—A **suffix** is a letter or letters attached to the **end** of a root word. A suffix is more important to **spelling** than a prefix because a suffix often changes the *spelling* of the root word. A suffix does **not usually change the meaning** of a word, but it **does often change the part of speech** of the word (which can also aid in understanding meaning).
 - (a) joyfully--ly tells you this is probably an adverb--this word usually means doing something with joy
 - (b) graciousness--ness tells you this word is a noun; this word means the idea (noun) of grace
 - (c) elongate--ate tells you this word is probably a verb; this word means the act of making longer (see "long" in it?)

Using This DD Trick

- (1) Underline the word in question with one color of highlighter.
- (2) Box any roots, prefixes, and suffixes you can locate with different color highlighters.
- (3) First of all, see if you know the meaning of the root word or partial root word you boxed.
- (4) Then, see if you know the meaning of the prefix. (See roots and affixes list coming up)
- (5) Next, see if the suffix and the place it is used in the sentence can tell you the part of speech of the word.
- (6) If you still cannot discern the word's meaning, use another DD trick with the steps above.

Example:

He was in an **un character** istical **lv** foul mood.

- 1. un = not
- 2. character = has to do with a person's character or personality
- 3. ly = adverb

Thus, in this sentence it means that the describer foul is not normally in his character or personality.

- 4. TRIGGER WORDS--Find a trigger word that tells you what the questionable word might mean. A trigger word is a word in the part of the sentence with your questionable word that tells you that, that part of the sentence is going to be in agreement or disagreement with another part. Trigger words are similar to clue words, but they will be easier for you to find since you probably already know many of them through CQLA grammar studies. They are strong writing techniques because they add variety to your sentence structure--but they also have meaning. There are two main types of trigger words, both taught extensively in CQLA grammar and through the Checklist Challenge.
 - a. Conjunctive adverbs

Result: therefore, consequently, of course

Concession: nevertheless, yet, still, after all, of course

Apposition: for example, for instance, that is, namely, in other words

Addition: moreover, furthermore, also, in addition, likewise, further, in addition to, similarly

Time: meanwhile, in the meantime

Contrast: however, instead, on the contrary, on the other hand, in contrast, rather

Summary: thus, in conclusion, then

Reinforcement: further, in particular, indeed, above all, in fact

b. Coordinating conjunctions

F or, A nd, N or, B ut, O r, Y et, S o (FANBOYS)

Using This DD Trick

- (1) Underline the word in question with one color of highlighter.
- (2) With another color highlighter, box any "trigger words."
- (3) Using the word or words you boxed in step two, determine whether the questionable word is in agreement or disagreement with other parts of the sentence.
- (4) Now read the sentence aloud, substituting a word (one that "might fit") you know for the questionable one. This word quite possibly could be a synonym (word that means the same) for the questionable word.

Examples:

I thought she was fairly friendly; however, when I got to know her better, I found her to be contentious.

However tells you that the questionable word is going to be the opposite of the word friendly.

I thought she was fairly friendly; moreover, when I got to know her better, I found her to be absolutely exuberant.

Moreover tells you that the questionable word is going to be *similar to* (even more so!) the word *friendly*.

^{***}Notice how both of those grammar terms have *conjunct* in them--they are both joining types of words--joining parts of sentences together, often to either tell how each part is the same (*and*, *thus*, *moreover*, etc.) or how each part is different (*however*, *but*, *on the contrary*, etc.).

5. <u>CONTEXT.</u> As shown in the clue words and trigger words examples earlier, the context of the passage can tell you a lot about a word's definition. Using other words in the sentence can help you tell what a questionable word means, but so can other <u>sentences</u> around the difficult word. Sometimes it helps to carefully examine the <u>sentence before and the sentence after the one containing the questionable word.</u>

Using This DD Trick

- (1) Underline the word in question with one color of highlighter.
- (2) Read the entire sentence to see if you can find any trigger words or clue words within the sentence.
- (3) Examine the questionable word for a familiar root, prefix, or suffix.
- (4) If you still cannot determine the word's meaning, underline the sentence before the one containing the difficult word with one color of highlighter as you read it aloud.
- (5) Underline the sentence following the one containing the difficult word with a different color highlighter, as you read it aloud.
- (6) Do you see any clue words, trigger words, etc. in those sentences that can help you with your difficult word? Box those.
- (7) Now use all of the hints above to decipher the questionable word.

Exam	bl	e

The girl was miserable in the small train car. She had not realized that she was claustophobic until her trip.

However, that vacation left little doubt about it.

Miserable and *small train car* can help us know that the girl's misery has something to do with the train car; *small cars* tells us it has something to do with the size of the train car.

6. <u>SYNONYMS</u>--Learn words together that have similar meanings. This trick will not necessarily help you determine the meaning of a word you encounter, but it will help you to expand your vocabulary--which will eventually help you comprehend challenging words in text.

CQLA has a list of vocabulary words at the beginning of each weekly lesson that all have something to do with each other. Many times these are synonyms--words that mean the same as other words. By learning words that have similar meanings together, you are more likely to remember their meanings. You will have a "learning hook" on which to put new words--hooks that already contain words you know.

Example:

All of the words below have something to do with (are synonyms for) or are similar to the word *lazy: idle*, *indolent*, *shiftless*, *slothful*, *apathetic*, *languorous*, *lazyish*, *lethargic*, *listless*, *sluggish*, *torpid*

If you learn these words together, you will be more likely to remember them. Also, since you already know many of them, it is easier to relate the unknown words to the known ones.

Using This DD Trick

- (1) Underline the word in question with one color of highlighter.
- (2) Go to an online thesaurus or book thesaurus and key the word in the search (or look it up in your book).
- (3) Write down all of the words that are synonyms or near synonyms for the word in question.
- (4) Re-read the sentence containing the questionable word aloud, substituting any of the synonyms from your list that you are familiar with.
- (5) Optional: Study the Similar Words Chart and choose one list of words to work on. Write sentences using some of these words according to your teacher's direction.

Roots and Affixes List		
(a) GEN <i>birth, race, kind</i> generous, generate, generation, geneology, gender	(b) DIC, DICT, DITtell, say, word dictate, verdict, edict, contradict, predict, diction, indict

- 4. Fractious (adj): quarrelsome; unruly The **fractious** relationship was rarely on good terms.
- 6. Ingrate (noun): an ungrateful person Clara was such an ingrate that her mother didn't get her any gifts.
- 8. Notorious: known widely and usually unfavorably The outlaw was **notorious** for his shifty ways.
- 10. Reprehensible (adj): worthy of blame The felon's **reprehensible** track-record was appalling.

Difficult, Unknown

- 1. Convoluted (adj): intricate; complex The young man was stumped by the **convoluted** puzzle.
- 3. Futile (adj): having no useful purpose; pointless Their efforts for change were **futile**. Nothing changed.
- 5. Obscure (adj): relatively unknown; to conceal or make indistinct 6. Quandary (noun): a state of uncertainty or perplexity The professor had never heard of such an **obscure** book.
- 2. Cryptic (adj): difficult to comprehend The signs were **cryptic**; no one understood them.
- 4. Impede (verb): to slow the progress of They tore down the bridge to impede their enemies.
 - The detective was in a **guandary** because he had no clues.

Environment

- 1. Arid (adj): describing a dry, rainless climate The dry desert is known for its arid climate.
- 3. Nocturnal (adj): of or occuring in the night The **nocturnal** animal slept during the day and was awake at night
- 2. Conflagration (noun): a widespread fire There was a **conflagration** in the woods. It all burnt down.
- 4. Sonorous (adj): producing a deep or full sound John's **sonorous** voice sounded commanding and manly.

Excessive

- 1. Ebullience (noun): intense enthusiam She was filled with **ebullience** when she left for Florida.
- 3. Egregious (adj): cospicuously bad or offensive The doctor made an **egregious** error in not cleaning his tools.
- 5. Frenetic (adj): wildly excited or active The boy was **frenetic** about going to Disney World.
- 7. Superfluous (adj): extra; unnecessary After the cake was made, they had some **superfluous** sugar.
- 2. Effusive (adj): emotionally unrestrained; gushy The baby was **effusive** about not wanting to go to sleep.
- 4. Flagrant (adj): extremely or deliberately shocking or noticeable Burning the flag shows **flagrant** disrespect for our country.
- 6. Gratuitous (adj): given freely; unearned; unwarranted Grandma gave the disobedient boy a gratuitous gift.

Fake, Lying

- 1. Dubious (adj): doubtful; of unlikely authenticity The **dubious** evidence was not enough to convict.
- 3. Hypocrisy (noun): practice of pretending to be something one is not Those who say one thing and do the other are guilty of hypocrisy.
- 5. Spurious (adj): not genuine; false, counterfeit The man made a **spurious** claim when he said the sun was blue.
- 2. Fabricated (adj): made; concocted in order to deceive The **fabricated** story had many loopholes.
- 4. Slander (noun): false charges malicious oral statements The book was so outrageous that the author was guilty of **slander**.

Higher and Lower

- 1. Condescending (adj): *treating people as weak or inferior*The children felt inferior because she was **condescending**.
- 3. Despotic (adj): exercising absolute power; tyrannical He was a **despotic** ruler because everything depended on him.
- Disdain (noun): contempt, scorn; to look down on
 I felt nothing but <u>disdain</u> for the person who cheated on the test.
- 7. Imperious (adj): *arrogantly domineering or overbearing*She bossed everyone around with her **imperious** attitude.
- Contemptuous: feeling hatred; scornful
 He didn't get along with her because of his contemptuous spirit.
- 4. Dictatorial: *domineering; oppressively overbearing*He was <u>dictatorial</u>; he expected everyone to listen to him.
- 6. Haughty: *arrogant; vainly proud*His **haughty** attitude showed that he thought he was the best.
- 8. Patronizing: *treating in a condescending manner*He was so <u>patronizing</u>; he treated everyone like little kids.

Highly Consider

- 1. Catalog (verb): to make an itemized list of Katie decided to **catalog** her expenses to be organized.
- 3. Facile (adj): done or achieved with little effort; easy
 The homework was so facile that Dylan finished it all quickly.
- 5. Hierarchy (noun): a group organized by rank
 The social <u>hierarchy</u> caused many to feel left out.
- 7. Laudatory (adj): *giving praise*The teacher was **laudatory** to her students. They got high scores.
- 9. Paramount (adj): of chief concern or importance
 The **paramount** issue is the salvation of each person.
- Solvent (adj): able to pay one's debts
 After losing money for years, the Smith's finally became <u>solvent</u>.

- 2. Exemplary (adj): commendable; worthy of imitation
 Jay's exemplary behavior caused others to want to be like him.
- 4. Fastidious (adj): having careful attention to detail; hard to please Lisa's fastidious decorating made things intricately beautiful.
- Idealize (verb): to consider perfect
 The fans <u>idealized</u> the new pitcher. He was going to disappoint.
- 8. Meticulous (adj): extremely careful and precise
 His meticulous gingerbread house looked perfect.
- 10. Pragmatic (adj): *practical*John was too **pragmatic** to go to the movies at midnight.
- Venerated (verb): highly respected
 President Lincoln is venerated for keeping our country together.

Inborn, Closeness

- Inherent (adj): inborn; built-in
 One of Kara's inherent weaknesses was her height.

Donna Reish, mother of seven grown children and thirty-two year homeschool veteran, is a prolific curriculum writer, blogger, and teacher from Indiana. She graduated from Ball State University with a degree in Elementary Education and did master's work in Reading Specialist following that. Donna began writing curriculum for a publisher out of Chicago specifically for homeschoolers twenty years ago. Following the completion of those thirty books

over ten years, she and her husband started a small press publishing company writing materials for homeschools and Christian schools. With the surge of digital products, Donna now writes curriculum books that are digital downloads (both secular and faith-based products), bringing her total curriculum products to 120 books of 50,000+pages. Donna tests all of her books with 50-80 in-person students each year locally before they are published--and this is her real love: Seeing the faces of students who achieve language arts goals that they never thought were possible using her creative, incremental approaches and materials. Donna teaches parents, teachers, and teacher parents, about grammar, language arts, writing, reading, learning, and more at her teaching website, *Language Arts Lady Blog*, and through her videocasts/podcasts, *How I Teach*.
